

I stopped listening to standard broadcast radio long before xm came about. I was sick of the ramming of crap down my ear canals. for the same reason I stopped watching tv. "all kinds for Television."
In a country in termoil I think we all seem to loose site of what this country is about! Freedom and enterprise. But when a product is better and makes the consumer happier than with yours, We foget the fact that freedom is what makes this great country grow! I say make your programing more interesting you might make some kind of a comeback.

I realize you have to make money with commercials but common!!! some of this commercials are so anoying (when I was listening to radio) I would either change the channel or I would turn it off completly, now, off, off, and not turn it off for hours and then days and now I don't even come close to listneing to comercial radio...

I Say Figure it out and get a life. Pull your head out of the sand. Let XM Live! it is an outstanding service. Oh and by the way ... I pay for this service. and that is none of your business.

Thank You..

Steven C Edwards
